

K12 DISCIPLINE MANAGEMENT

TRACKING STUDENTS BY ID CARD - MOBILE AND DESKTOP APPLICATIONS

Our K12 Discipline Management solutions allow school administrators the ability to get information on students from anywhere on campus. PockeTracker K12 uses Pocket PC devices, while RapiDtrack K12 is a desktop software solution. These applications work hand in hand with your student database. It has never been easier to monitor the halls, check student schedules, or issue violations and detentions. With PockeTracker K12 and RapiDtrack K12 you can say goodbye to handwriting passes forever.

scan student IDs verify student information

POCKETTRACKER K12

Our mobile ID tracking solution allows your administrator's to take the show on the road. With PockeTracker handheld devices and Bluetooth portable printers in hand, every student can be verified on the spot. Make sure students are in the correct location or issue them passes, violations, detentions, or even schedules. At the end of the day simply synchronize your handhelds to generate reports and identify those students with violations.

RAPIDTRACK K12

RapiDtrack K12 can be installed on your school's existing PCs. Typically loaded on a central PC in the school's main office, RapiDtrack K12 can help minimize paperwork and get tardy student processed and off to class. Individual and daily transaction reports can be generated, as well as parental notification and detention lists. In addition to discipline, this system can be used for positive behavior tracking using positive points.

View Student Schedule

RAPIDTRACK K12

1 SCAN ID CARD

Using a barcode reader on your PC or mobile device, you can quickly scan a student card and instantly see their photo. Manual look up is also an option if a student does not have their ID handy.

2 VERIFY STUDENT INFO

After scanning the card you will have instant access to student information. View their schedules, violation history, photo and more.

3 PRINT PASS

Desktop pass printers and Bluetooth mobile printers allow you to print passes to class. You may also print out copies of student schedules, violations, or assign and print detention slips.

FEATURES

- CHECK SCHEDULES
- ISSUE WARNINGS & DETENTIONS
- VIEW HISTORY
- GENERATE REPORTS
- COLOR SCREEN & PHOTOS
- AUTOMATE BEHAVIOR POLICIES

EXPLANATION OF FEATURES

Check Students Schedule

The student's class schedule can be obtained by simply tapping the 'Schedule' button. This allows the users to know exactly where the student is supposed to be during the day. This feature empowers the user to know if the student is on the wrong side of campus, skipping a class or is merely running a minute or so late.

Issue a Warning or Detention Slip

POCKETRACKER K12 can print a slip via Bluetooth or cabled printer. This slip can display the violation type and time and double as a hall pass or class slip for a tardy. The student photo can also be printed on the slip.

Based on PocketPC Technology

This makes POCKETRACKER K12 100% mobile. Monitor the hallways, campus perimeter and athletic events with POCKETRACKER. RAPIDTRACK K12 has all the same functionality from a desktop for single-point stationary tracking.

Look Up Past Violations

Past violations for a student can be viewed just by tapping the 'History' button. This will display the entire student's violation history by date, allowing a quick assessment of that student's violation history.

Assign New Violation with a Single Tap

Violation types are displayed in a drop down menu, making assigning the proper violation a snap. Simply select the proper violation and then tap Save. The violation, student, time and corresponding disciplinary action are all recorded immediately.

Generate Accurate Reports

By capturing date and time, student information, violation type of disciplinary action assigned, very accurate reports are at your finger tips. Examples would be a report of all detentions assigned for Wednesday or a report showing all violations recorded today. Reports can even be generated showing the violation history for a student.

Color Screen and Photos

The interface for POCKETRACKER K12 is in full color along with a full color photo of the student last scanned. POCKETRACKER K12's simple but powerful interface allows for greater accuracy when assigning students violations by displaying their photograph for immediate visual verification.

Automate Behavior Policies

POCKETRACKER K12 uses a rule base designed and tailored to your specific environment. Violations, warnings, detentions and suspensions are all based on rules specifically customized to match your school's policies. Once the rule base is set, all of the POCKETRACKER K12 devices use this rule base to automatically assign the proper action to each violation. An example would be a warning slip for the first two tardy violations and assigning a detention for the third and any subsequent tardies.

WHY USE POCKETTRACKER & RAPIDTRACK K12

HALL MONITORING

- View student schedule to verify where a student should be
- Print a pass/tardy slip for the student on the spot
- Assign and record violations on the spot

CAMPUS SECURITY

- A quick ID scan or look up lets the user know if a student actually attends your school or not
- Loitering students can be quickly processed and sent back to class
- Look a student up by name, or ID number even if they do not have their ID card

TRACK STUDENT ACTIVITY

- All information, violations and disciplinary actions are stored in a database for easy recall
- Customizable reports can display any information stored in the database any way desired
- Information is power and POCKETTRACKER K12 puts the information at your fingertips

SAVE TIME

- Disciplinary paperwork is virtually eliminated by POCKETTRACKER K12
- Detentions and other disciplinary actions are automatically generated
- Students are automatically assigned to the next available detention and placed on a roster for its attendance
- Look up a student's history in a few seconds

SAVE MONEY

- Much less time needs to be spent controlling the disciplinary infrastructure of running a school
- Free up resources to enforce discipline rather than shuffling paperwork

POCKETTRACKER K12 SPECIFICATIONS

- Wireless Connectivity: Optional: Integrated 802.11b & Bluetooth wireless technologies
- Operates on most PocketPC handheld devices running Windows Mobile 5 or later in a .NET environment
- Interfaces seamlessly with MS-SQL desktop, and required accompanying RAPIDTRACK K-12 Gateway is loaded on PC/Laptop
- PC specifications for the one required gateway utility are those of minimum Windows requirements for the operating system as well as any specifics for the PocketPC device

RAPIDTRACK K12 SPECIFICATIONS

- 32 Bit ODBC compliant for Microsoft Windows 2000/XP/Vista
- Links to any ODBC compliant table so it can work with an existing ID card database or another system table
- PC specifications are those of minimum Windows requirements for operating systems as well as for any add-on peripheral used with system such as a card reader, biometric reader, or pin pad.
- MS-SQL Server database capable of linking to other ID card and administrative systems
